

Rank Life Up

1. Automatic detection as well as blocking of video game websites

2. Basic English and Math Captcha whenever the user tries to access a blocked website

3. It doesn't even track or store any of your data therefore giving your children the full privacy and anonymity that they deserve when they are online

I Need This

Home/Landing Page

I need this is the button to navigate to the account page

Account

In order to explore all of the features of my product, please create your account by entering the following information below:

Username:

Password:

Account page

Allow to type anything in the username and pin section don't need to store anything just have to visualize the ability to type

**This website has been
blocked**

Blocked website page

Must appear whenever the user tries to access any restricted site i have put sites in the blocked_sites.JSON file any 2 sites working is fine

Question 1

Submission box for student

**It is scrollable so it will be adjusted as
needed**

Answer of question 1

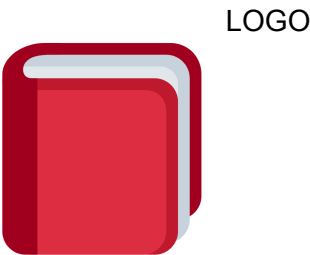

**Which will be displayed after the model
is done analyzing the answer provided
by the student**

Captcha page

I have put a few questions in a JSON file 1 has to appear in the question box and rest of the boxes can just be empty this has to be displayed when the user clicks on the extension after visiting a blocked website or fine even if it's shown automatically or it can even be shown as a separate page which is fine as i will be editing my product video

This has to appear when the user clicks on uninstall the extension dialog the pin typed can be random and the uninstallation can proceed it is fine even if this feature doesn't work i just need to show this page maybe even as a separate page regardless of whether the user clicked on uninstall or not as i can just edit the product video.

Colors in HEX code

Does Not have to exactly match just have to look real

Deadline is 20th march
I have put everything in the simplest way possible please message me if u have any queries
